Victoria Arduino

since 1905

**Your espresso
coffee machine
since 1905.**

Victoria Arduino
since 1905

Victoria Arduino was founded in 1905 by Pier Teresio Arduino, with the aim of building an espresso machine that did not compromise on quality, materials or performance. The result redefined the perimeters of modern espresso coffee machines.

The company is now based in Belforte del Chienti, Italy, and continues the tradition of Pier Teresio Arduino investing in research to offer the most advanced espresso technologies.

Victoria Arduino is 2015-2017 World Barista Championship official partner with its VA388 Black Eagle espresso machine that is used by the best world's baristas . All share the same passion that drives us in our mission to build the ultimate espresso coffee machine.

Single Group

PRIMA represents a new way to prepare and enjoy espresso coffee. It is dedicated to baristas planning their coffee business, to roasters that would like to search and offer a serene coffee experience for their clients, to professionals that desire a high-quality espresso even at home, and to all the international community of coffee lovers. It is a versatile and eclectic coffee machine that opens to a new way of living and perceiving the coffee experience.

THE FUTURE OF SPECIALTY COFFEE

Eagle One is born in response to the **new generation of coffee shops** where **DESIGN**, **PERFORMANCE**, and **SUSTAINABILITY** are determining factors to create a pleasant and memorable experience.

2
GROUPS

NEO - New Engine Optimization

The Eagle One was developed to reduce our environmental impact by embracing new technology. Carbon emissions from power consumption are minimised through the use of new materials and the unique design of the machine. This can save you money on your power costs, especially when compared to other machines.

The NEO engine uses an instant heating system with a unique insulation mechanism, that reduces not only the heat dispersion but also energy consumption. It works almost instantly, allowing only the necessary amount of water for the extraction to be heated, thus reducing energy-related costs. Productivity and performance remain high, but consumption is considerably reduced. The LCA* (Life Cycle Assessment) demonstrated how the Eagle One had a 23% less environmental impact concerning the same category machine.

TERS (Temperature Energy Recovery System) uses the discharged water to pre-heat the incoming water. The result is a 8% saving on total machine consumption.

Design is simplicity.

For the shape of the Eagle One, Victoria Arduino was inspired not only by its impressive history, but also concentrating on the needs of the new era coffee shops that require compact, efficient, and sustainable machines. This is how design and innovation fuse: having a substantial impact inside the machine in directly related to its new form. The result is a compact object, simple to use, minimal design, with a new engine able to guarantee high performance and energy efficiency.

Ergonomic
machine

'Cool Touch'
steam wand

The choice of true barista champions, the VA388 Black Eagle from Victoria Arduino is quite possibly the finest machine on the market.

Total control of brewing time and liquid weight in the cup.

Above the group head there is a display that allows baristas to monitor parameters such as brewing time and weight of the cup. This combined with Gravitech gives baristas the highest level of consistency and control over the coffee brewing process giving maximum precision.

Technology that ensures maximum temperature stability.

T3 technology allows the barista to set three independent temperatures for the brewing group, the water infusion, and the steam. Giving control of the water supply's thermal accuracy that results in temperature stability and ultimately in a perfect espresso.

Description

Unparalleled Consistency

Suitable for: Specialty coffee shops, High quality coffee shops, high volume locations, demanding professionals, barista competitors

The VA388 Black Eagle is the espresso machine for all of those who dedicate their lives to coffee; who study, research, and experiment every day to bring a meaningful coffee experience to the cup.

Gravitech: With gravimetric technology, the weight of the liquid extracted is measured directly in the cup. The data is therefore much more precise and, more importantly, is not affected by other factors, such as the shape of the filter, the tamping force on the coffee, the condition of the showerheads and more. The barista always has full control of each delivery, the quantity in the cup is always programmed and any difference between one delivery and the next is eliminated.

White Eagle The Quality Machine

Description

Elegant, Efficient, Stylized

Suitable for: *High quality coffee shops, high volume locations, demanding professionals, barista competitors, specialty coffee shops.*

The VA358 White Eagle looks to continue the trend of offering specialty coffee shops an espresso machine that is consistent, reliable, and efficient. Designed to enhance the relationship between the customer and the barista, the VA358 puts quality first. With two available variations this machine has something to offer every coffee shop.

Design object

High quality materials

Technology

This machine was built to incorporate some of the newest technology in the industry.

T3 Technology: Using T3 Technology one can independently set the temperature for each group head. Allowing different blends to be customized in the machine.

Volumetric Dosing: Up to 4 doses can be programmed per head.

Shot Timer: With a built in shot timer function, each brewing head can be timed independently without the need for an external timer.

Automatic Cleaning: The White Eagle allows independent automatic cleaning of each individual group. Meaning that washing and taking orders can be carried out simultaneously. No longer does one need to wait till the end of the day at the possibly risk of coffee quality.

Energy Saving: The White Eagle can be programmed to turn on and off at any time you desire. Saving energy and time.

Reverse mirror: With the reverse mirror, the barista can now watch the coffee filter output without bending down. A little foresight that will be appreciated by all of those who use it.

Cool Touch: The Cool Touch steam lever is thermally insulated to be safe for the barista and easy to clean.

HERITAGE COLLECTION

VENUS BAR

A coffee machine that tells the story of espresso and which is a symbol of handmade espresso machines. The Venus Bar, with its vertical volume, technical features and the use of precious materials, continues to be a coffee machine still highly appreciated for its old-time design and its technology.

Aurelia Wave, T3

Suitable for: *High quality coffee shops, high volume locations, demanding professionals, barista competitors, specialty coffee shops.*

The Aurelia Wave T3 is the ideal espresso machine for those looking for unprecedented performance and reliability. T3 technology gives the barista unheard-of control of water temperature throughout the machine.

Wave T3: The Aurelia Wave T3 builds off our old Aurelia II T3 and digital machine adding a number of improvements. Our latest technology; Pulse Jet, gives even more control to the user allowing them to stop and start the flow of coffee at different/customizable intervals allowing the coffee to bloom in a number of ways. T3 technology gives the barista complete control over the temp of the primary boiler, the coffee groups' boiler, and the head of each group. While the high resolution touch screen continuously talks to these components for quick and easy adjustments. The Independent group head timers display shows independent shots simultaneously, eliminating the need for external timers. This machine also comes standard with many of the same features as the digit model, including, automatic purging, automated cleaning, boiler pressure program, energy saving settings, and much more.

MDX On Demand Grinder

The MDXS On-Demand is a direct evolution of the MDX On Demand. Included in this evolution is a new design, bean hopper, metal doser lever, silent grind tech, and external dosage regulator. for you.

Perfect for medium size shops, this grinder can quickly and accurately dose high quality shots in a matter of seconds. A feature that will be appreciated in any shop especially when combined with the ability to program dosages. If you're looking to improve consistency and efficiency this might just be the machine

Musica

Simple Efficient Compact

Suitable for: *Homes, Offices, Mobile Locations, Dinners, and Small Shops.*

The Musica is an elegant compact volumetric machine capable of delivering high-quality espresso. This machines size, output, and styling making it ideal for a number of venues.

Volumetric: The Musica is a volumetric espresso machine, allowing the operator to program up to three independent dosages. Once programmed the three independent dosages can be easily selected via the back-lit *soft-touch buttons*, found on the front of the machine. All of which can be dimmed and brightened to fit-in at any setting.

Oscar II

Simple Efficient Compact

Suitable for: *Homes, Offices, Mobile Locations, and Small Shops.*

The Oscar II much like its predecessor has been built around the idea of bringing professional quality espresso into the home. Besides the new stainless steel & ABS body, the Oscar II hosts a number of new useful features that further push the limits of what an affordable home espresso machine can do. Including a new ergonomic steam lever, timed dosage, and improved steam-wand. Inside the machine the Oscar II maintains its professional sized group head and copper boiler. Making the Oscar II the perfect machine for any coffee enthusiast.

**Grinta
Grinder**

[AREMDE]

The AREMDE partners came together: a designer, an engineer, an entrepreneur and a marketer. From different continents, from different cultures, but with one common goal: the future of professional coffee remade.

Simply, because they disliked what they saw in almost every coffee bar around the world. A wall of steel, also known as the traditional bulky espresso machine. Put in front, it separates the baristas from their customers; placed against the back, it forces the baristas to turn their back on people. Where others accepted this as a given, we saw an opportunity.

ASTORIA TEMPESTA

For more than forty years astoria have been working with dedication to offer the barista the best instrument with which to serve an impeccable coffee. Astoria is a historic brand that represents the Italian tradition of espresso coffee machines. It is also the original core of the CMA group, which was founded in 1969 by Nello Dal Tio. It was officially acquired by the Ryoma holding company of Milan in October 2012. Today, after a long growth process, Astoria represents excellence in espresso coffee machines around the world. Our passion is a perfect espresso, one that represents the style of baristas throughout the world who choose Astoria.

Innovative Technology, modern Design, proven Quality

Rex Royal was founded in 1937 have combined with passion for technology and the knowledge of coffee specialists to fulfil the requirements of gastronomy today with a wide and modular range, whether as self-service or counter service. The innovative power of a modern Swiss family business with many years of experience in the production of professional, fully automatic coffee machines lies behind the Rex-Royal product range. The production site in Switzerland is an essential factor in securing the high-quality standards of our products. Swiss values such as reliability, precision and high-quality workmanship shape our coffee machines, that all bear the mark “Made in Switzerland”.

COFFEE BEANS

Tiziano

Qualità superior (Made in Italy)

Typology: Beans

Quantity: 1000gr

Fine quality Arabica and Robusta Grand Cru. Origin: A blend of fine quality, Brazilian and central American Grand Cru arabica coffee, enriched with a hint of the spiced and full bodied flavor of the Indian Robusta coffees.

Roast: Medium.

Characteristics: A great character and a refined aromatic taste.
Tasting notes: A surprisingly well-balanced blend, distinguished by a refined and intense aroma, full bodied with spicy and tropical fruit notes and a round mellow flavor. A perfect balance between strength, aroma and acidity.

Speciale

Coffee espresso blend (Made in Italy)

Typology: Beans

Quantity: 1000gr

With its intense, creamy, full-bodied flavour, this blend is a pleasant balance of Brazilian Arabica Cerrado and finest Robusta varieties from the high plains of Central America and some washed and selected Indian Robusta grade 1; the result is an espresso with notes of citrus, a chocolatey aftertaste and a hint of toasted bread.

FILTER COFFEE

LINEA TRADIZIONALE

The Traditional range brings to you typical Italian coffee with the intense aroma known throughout the world, ideal both in the morning and after meals. Perfect for those who love the distinct flavor of a robust coffee.

Classico

intenso e cremoso

Typology: Ground Coffee

Quantity: 1000g

This is the typical Italian breakfast coffee for those who need a burst of energy throughout the day; it's a full-bodied intense coffee, obtained by selecting the best Arabica and Robusta origins. Ground coffee for espresso maker

The perfect expression of the tradition of Italian roasting. A blend of the finest Arabica coffees, designed to create an espresso of exceptional quality and slow roasted to gently release its outstanding aroma

FLOR FINA

A blend of great French tradition. Cafés Richard roasted beans with 80% blend of Arabica a sweet, fragrant coffee with an exceptionally long mouthfeel, great body with harmonious aromatic balance.

MASSAYA ORGANIC

A powerful coffee from organically farmed land. An ample cup of coffee with a nice long mouthfeel. A rounded, distinctive coffee with a solid body and light woody notes.

COFFEE BEANS

MOKA - 500gr

Discover this Moka coffee beans from Ethiopia, a 100% arabica from the famous Yrgacheffe region, roasted in France by Café Richard.

COLOMBIA – 500gr 100% ARABICA

AN EXCEPTIONAL TERROIR – SINGLE ORIGIN A Colombian Grand Cru Arabica grown in the Andes, a region characterised by its snow-covered volcanoes.

DK – Cafes Richard

The DK Richard offers all the pleasure of an aromatic coffee without the caffeine. The DK Richard is a decaffeinated blend which retains all of its aroma and flavor, offering an enjoyable espresso or slow brew coffee at any moment of the day.

TCHABA
A CUP OF TIME

The culture of authentic tea
Fully leaves hand-picked tea leaves from the finest
plantations from around the world

LUXURY TEA BLENDS

Founded in Marrakech in 2006, Tchaba came to life out of a genuine passion for the tea leaf and its virtue. Made up of a full leaf tea hand picked in the most prestigious plantations from Japan to Kenya, including India, China, Taiwan or Sri Lanka, Tchaba teas are the promise of a unique aromatic experience, sustained by the long finish, balance and texture of its 75 blends, delicately enveloped in handcrafted silky sachets.

"Tchaba" means tea leaf in Japanese, and it's by drawing on the origins that the label has been able to extract all the greatness of the tea, to deliver something essential and precious, like a new ritual, the time of cup of tea

Ceylon Earl Grey
Black Tea-Bergamot Oil

This popular morning blend hails from the fine Dimbulla region of Ceylon and is noted for its strong, full bodied and brisk taste. Located in the western part of the central highlands of Ceylon, the Dimbulla region provides the perfect climate to produce teas of distinct taste and aroma. To heighten the character of our blend we have expertly selected only teas growing above 4000 feet.

SAFFRON FILAMENT

Safrina® fully guarantees the quality of the saffron offered and certifies it is 100 % pure and free of any artificial ingredient. Our product is handled very carefully keeping intact their properties to ensure a healthier diet.

It is used on thousands of preparations like rice, pasta, paella, soups, stews, ice-creams sweets and coffee. It has also excellent properties being a natural product, that's why it has been used since ancient times by oriental medicine. It is enough just a pinch of saffron to give your dishes a distinct flavor and aroma. To give a rough indication, we must add 2-4 saffron threads per person and to cook Paella. We recommend adding 0.5 g saffron to 750 g of rice for around 10 portions.

Made in Spain
